
Matt Saul • LAMP Stack Web Developer

mattsaul.com matt.saul@gmail.com

I am a jack of all trades web developer who has worked for nimble startups

SKILLS: Web Development, PHP, MySQL, jQuery, CSS/Bootstrap, WordPress, CodeIgniter MVC, stringing REST API's together, security troubleshooting, payment gateways, photo and video editing

WORK EXPERIENCE

FOUNDER: Fundraising Agent

2019-

- Given a design and business logic, created a turnkey fundraising platform featuring fundraisers and organizations which pays out commission to both with every donation
- Designed front facing sites that allow organization and donor signup and back offices that reported donations and commissions
- Interacted with payment gateway to receive donations and automatically process them with our partners

WEBMASTER: North End Community Ministry 2013-

- Manage design and content of WordPress website
- Schedule social media posts and check on their reach
- Produce e-mail campaigns for fundraiser dinners and events like the Meijer Simply Give campaign

WEBMASTER: Where There are No Jobs

2009-

- Produced a website and graphics to promote a microfinance book for the developing world
- Created an Android React Native mobile app to showcase the book's case studies
- Converted an online course to the open-source Moodle education platform for interested parties to take

EDUCATION

B.S. in Computer Science • Wheaton College
Programming, anthropology, and humanities course work
GPA: 3.19/4.0

WEBMASTER: Hotels Etc.

2007-

- Designed and coded mobile responsive company and distributor websites that did millions in sales volume
- Collaborated via ZOOM with various partners and vendors
- Managed remote teams and worked with b2b clients that integrated with our back-end program
- Created a certificate incentive program that dynamically generates PDF's with redemption codes that can be activated seamlessly
- Wrote up documentation to explain integration computer code for our partners

WEBMASTER: Tradition Creek 2008-

- Developed a WordPress/WooCommerce storefront that is responsive and on par with other signature outdoor clothing brands
- Marketed store's products via Facebook, shopping aggregation engines, and newsletters
- Managed product addition and removal and created animated banners which were tracked for sales via Google Analytics
